

BB-RT290 LED MOTION SENSOR LIGHT

SPECIFICATION

This light is manufactured from durable & lightweight ABS plastic material with 2 super bright LED bulbs, 120° detection angle & 2 functions of on-auto-off. The back comes with a hang hole for use with a nail or screw, or use the self adhesive sticker. The motion sensor activates the light for 25 seconds in dark conditions when motion is detected from up to 3m. It requires 3 x AAA batteries which are not supplied & it can be used in an attic, closet, bedroom, hallway & many other places.
